

# Papillon Club of America Health & Genetics

## ELYSE VANDERMOLEN

I can't remember a time that dogs were not a large part of my life. I grew up with a variety of dogs. I attended my first Papillon National Specialty in 1992.

My first show prospect from Jessie Johnson (Jeja Papillons) was also in '92. I have lived with the breed for over 30 years. It's a great breed. The breed was not as known back then and has since gained in popularity. What better way to give back to the breed than to work on the genetics committee? Hopefully thru education, research, sharing of knowledge; we will keep our breed a healthy breed.

In addition to PCA I am a member of the Houston Area Papillon Club, Houston Kennel Club, Toy Club of Greater Houston, and the Anatolian Shepherd Dog Club of America. My husband Todd and I work in our business in Webster, Texas, Clear Lake Kennels, Inc.
