

Papillon Club of America Health & Genetics

JEANNE HILTERBRANT

I have been a fancier of animal's especially dogs, cats and horses from my childhood.

My mother was pregnant with me when our family had our first show quality Great Dane.

I have trained, bred and/or shown horses, Great Danes, Dobermans, Standard Poodles, English Springer Spaniels and Papillons throughout my life.

What I learned most through the years is the profound importance of their health. My experience with my animals has led me to have a tremendous appreciation for learning and understanding their diseases and ailments.

I feel very fortunate to be a member of the Papillon Club of America Genetic committee and look forward to actively working toward health improvements in the future.
