

Papillon Club of America Health & Genetics

VICKI OLSON

My love for dogs started as a young child. I regularly encouraged dogs to follow me home and announce to my mother I had found a lost dog. Her answer to me was always "Vicki Lynn take that dog back where you found it".

My adventure into dogs started in my early 30's with American and English Cocker. Twenty plus years ago I discovered the breed that seriously captured my heart (our beautiful Papillons).

My interests are focused on breeding and whelping issues, genetics, conformation and scentwork.

I reside in Montana, am president of my local all breed club and a leader for 4H dog showmanship.
