

GENETIC COMMITTEE MEMBER : AMY REAGAN

Papillon Club of America Health & Genetics

AMY REAGAN

40 years ago, my original breed was Akitas. I experienced many health issues with this breed and became an advocate of health testing.

Years later I found myself with Papillons and wanted to also focus again on health issues.

I don't have a medical degree but just years of personal experience and heartaches that I would like share with others.

My professional experience is in Aerospace Operations Management, specializing in Industrial Engineering but am retired now. I am active and hold offices in our local and

breed club, also belonging to the Akita Clubs and an All-Breed club. I am a Breeder of Merit and compete in Conformation and Obedience.

I have been a member of PCA since 2007
